International Journal of Theoretical Physics, Vol. 16, No. 12 (1977), pp. 965–968

Author Index to Volume 16

Adams, Richard, C. *Analytic Supernova Models and Black Holes* 35
Ali, S. Twarque. *Quantum Statistical Mechanics on Stochastic Phase Space* . . 689
Alicki, Robert. *The Markov Master Equations and the Fermi Golden Rule* . . 351
Armenti, Jr., Angelo. *On a Class of Exact Geodesics of the Erez-Rosen Metric* . . 813
Asgekar, G. G. *On Space-Time Permeated by the Perfect Magnetofluid* . . . 465
Ashworth, D. G. *Geodesics in Rotating Systems* 845
Aspden, H. *A New Approach to the Problem of the Anomalous Magnetic Moment of the Electron* 401
Baracca, A. *Is a Bell-Type Inequality for Nondicotomic Observables a Good Test of Quantum Mechanics?* 491
Basano, L. *Information Flow, Causality, and the Classical Theory of Tachyons* . . 715
Bergia, S. *Is a Bell-Type Inequality for Nondicotomic Observables a Good Test of Quantum Mechanics?* 491
Bez, Helmut. *Quantization of Galilean Systems* 7
Burman, R. R. *Paths of Spinning Particles in General Relativity as Geodesics of an Einstein Connection* 211
Cannata, F. *Is a Bell-Type Inequality for Nondicotomic Observables a Good Test of Quantum Mechanics?* 491
Carmeli, M. *The Wigner-Lubanski First Ingegral in the Papapetrou-Corinaldesi Equations of Motion* 53
Cerveró, José M. *Contact Transformations and Conformational Group. III. Finite Non-relativistic Transformations* 333
Cerveró, José M. *Contact Transformation. IV. Contractions of Contact Lie Algebras* . 339
Charach, Ch. *The Wigner-Lubanski First Integral in the Papapetrou-Corinaldesi Equations of Motion* 53
Chela-Flores, J. *Remarks on Gauge Variables and Singular Lagrangians* . . . 659
Chukwumah, G. C. *Analysis of Weak Neutral Currents Using Light-Cone Algebra* . 837
Chukwumah, G. C. *Neutrino and Antineutrino, New Data and Vectorlike Models* . 875
Cohen, Jeffrey M. *Analytic Supernova Models and Black Holes* 35
Crampin, M. *Constants of the Motion in Lagrangian Mechanics* 741
Date, T. H. *On Space-Time Permeated by the Perfect Magnetofluid* . . . 465
Davies, P. A. *Geodesics in Rotating Systems* 845
Davis, Martin. *A Relativity Principle in Quantum Mechanics* 867
Dietz, Werner, *A Characterization of Carter's Separable Space-Times* . . . 541
Dita, P. *On the Construction of Analytic and Crossing Symmetric Partial Waves* . 201
Donato, P. *Scattering Eikonal for Two Classical Relativistic Particles* . . . 721
Englefield, M. J. *Third-Order Constants of Motion in Quantum Mechanics* . . 829
Enosh, M. *Differential Constants of Motion for Systems of Free Gravitating Particles. I. Newton's Theory* 895
Fillmore, Jay P. *The Fifteen-Parameter Conformal Group* 937
Fortunato, D. *Observable Consequences from Second-Type State Vectors of Quantum Mechanics* 1
Garuccio, A. *Observable Consequences from Second-Type State Vectors of Quantum Mechanics* 1

Grøn, Øyvind. *Rotating Frames in Special Relativity Analyzed in Light of a Recent Article by M. Strauss* 603
Günther, Christian. *Prequantum Bundles and Projective Helbert Geometries* . . 447
Guz, W. *Axioms for Nonrelativistic Quantum Mechanics* 299
Haavisto, J. *Higgs Fields, Curved Space, and Hadron Structure* 915
Hellwig, K.-E. *Propositional Systems and Measurements. III. Quasitensorproducts of Certain Orthomolecular Lattices* 775
Hindmarsh, J. L. *On the Bunge-Kálnay Position Operator for the Dirac Electron* . 443
Ivanova, E. V. *Invariants and Radiation of Some Nonstationary Systems* . . 503
Jánica-de-la-Torre, Ri. *Remarks on Gauge Variables and Singular Lagrangians* . . 659
Kálnay, A. J. *Remarks on Gauge Variables and Singular Lagrangians* . . . 659
Kálnay, Andrés J. *On Fermi Quantum Fields Constructed from Bose Quantum Fields and Their Applications* 481
Kálnay, Andrés J. *Poincaré Canonical Momenta and Nambu Mechanics* . . . 635
Kapoulitsas, George M. *Diffraction of Long Waves by a Semi-Infinite Vertical Barrier on a Rotating Earth* 763
Kovetz, A. *Differential Constants of Motion for Systems of Free Gravitating Particles. I. Newton's Theory* 895
Kowalczyński, Jerzy K. *A Few Properties of a Certain Class of Degenerate Space-Times* 357
Kowalczyński, Jerzy K. *Metric and Ricci Tensors for a Certain Class of Space-Times of D Type* 371
Krausser, D. *Propositional Systems and Measurements. III. Quasitensorproducts of Certain Orthomodular Lattices* 775
Kuznetsov, G. I. *The Matrix of a Finite Rotation in the Space of Trees.* . . . 345
Lakshmanan, M. *Method of Action-Angle Variables and the Classical Dynamics of a Nonlinear Lagrangian* 649
Lemke, H. *Kinematics for the scattering of Spacelike Momentum* . . . 307
Lessner, G. *An Approximation Method to Solve Einstein's Field Equations on a Curved Background Metric* 99
López, Carlos A. *Gravitational Energy from a Quadratic Lagrangian with Torsion* . 167
Lord, Eric A. *SO(4, 2)-Covariant Formulation of the Bargmann-Wigner Equations* . 389
Lubkin, Elihu. *Is Gravitational Dual Charge Physical?* 551
Lukács, B. *On the Rescaling Problem of Space-Time Admitting Groups of Conformational Motions* 419
Maczyński, M. J. *Conditional Expectation and Commutativity in von Neumann Algebras* 437
Majumdar, S. Datta. *Third-Order Constants of Motion in Quantum Mechanics* . . 829
Malkin, I. A. *Invariants and Radiation of Some Nonstatoniary Systems* . . . 503
Manià, Alessandro. *Segmented Structures* 13
Man'ko, V. I. *Invariants and Radiation of Some Nonstationary Systems* . . . 503
Mavrommatis, E. *The Functional Derivative of the Radial Distribution Function for a Many-Particle Boson System* 141
McVittie, G. C. *Relativistic Fluid Spheres and Noncomoving Coordinates* . . 121
Mignani, R. *A Path-Dependent Approach to Colored Magnetic Monopoles* . . 425
Minaar, David W. *An Elementary U(2) Theory of Radiation Fields with Spin 1* . . 177
Moore, Marvin G. *General Relativity without Tensors in a Central Field* . . . 273
Morato, L. M. *A Note on Fuzzy Observables* 707
Morris, Hedley C. *Pseudopotentials and the Inverse Scattering Problems of the Generalized Korteweg-deVries Equation* 227
Mudgett, Ralph A. *An Elementary U(2) Theory of Radiation Fields with Spin 1* . 177

Munoz, Reinaldo. *Analogous Riemannian Metric Description of Gravitational and Electromagnetic Interactions* 429
Neugebauer, G. *Entropy and Gravitation* 241
Ndili, F. N. *Analysis of Weak Neutral Currents Using Light-Cone Algebras* . . 837
Ndili, F. N. *Neutrino and Antineutrino, New Data and Vectorlike Models* . . 875
Osman, Ahmed. *Generalized Faddeev Equations for the Many-Cluster Problem* . . 81
Osman, Ahmed. *Short-Range Correlations with Pseudopotentials. IV* . . . 575
Pease, Robert L. *On Wyler's Value for the Fine-Structure Constant* . . . 405
Pereira, José Vassalo. *Bosons, Fermions, and the Feshbach-Villars Transformation* . 147
